

More than a child's nurse.

A pediatric nurse doesn't just take care of me.

When you **choose pediatric nursing**, the care and education you give impacts my whole family.

You'll get to know who lives with me and takes care of me. You'll help my caregivers support a healthy life, learn about developmental stages, and understand treatments when I'm sick.

Want to make a difference for children and families?

Be there for us.

Be a pediatric nurse.
