CERTIFICATION	<p>CNSs take a national board exam to become certified, such as:</p> <ul style="list-style-type: none"> > Pediatric CNS > Child/Adolescent Psych & Mental Health CNS

ASK A PEDIATRIC NURSE.

A pediatric nursing professional should introduce themselves and make your child feel at ease during the interaction.

Always feel comfortable asking the nurse about their role in your child's care.

Should you have care questions, please ask! Especially about:

- > Medication
- > Hospital or surgery discharge instructions
- > When to call your child's healthcare provider
- > Behavioral or mental health concerns

Family-centered care is a big part of nursing, and you are your child's best advocate!

DID YOU KNOW?

Pediatric nurses work in many different places like home health, schools, camps, and outpatient clinics.

To stay certified and licensed, pediatric nursing professionals show evidence of continuing education.

PNPs and CNSs provide care for birth through age 21. In certain situations (like cystic fibrosis), they may be able to provide care beyond age 21 until successful transition to adult health care providers. State boards of nursing regulate age ranges.¹
